Subject: Microsoft Settlement

I would like to it to be known that I think the Microsoft Settlement to be a farse. I believe the only way to end Microsoft's monopoly would have been to break it up into two separate companies, one in the Operating System businees and the other in the Application Software business. This settlement was a direct product of this Administration's ties to Microsoft.

I subscribe to the views expressed in Dan Kegel's petition, and have signed it myself.
